STEEL PIPE NIPPLES & PIPE

SCH 40 / 80 / 160 / XXHVY | WELDED & SEAMLESS

CERTIFICATION OF COMPLIANCE

The Edmund A. Gray Company, Inc. certifies that all our pipe nipples are domestically manufactured in the USA with the majority at our factory in Southern California, and that these products are manufactured in accordance with the Standards and Specifications listed herein.

The Edmund A. Gray Company regularly communicates with our raw material and finished goods suppliers and, to the best of our knowledge and belief, based on their responses to us, as well as our own testing, measurement, and monitoring, that the raw materials and finished goods being supplied to us are also manufactured in accordance with the Standards and Specifications listed herein.

The Edmund A. Gray Company continually inspects finished goods and raw materials to make sensible efforts to ensure that any changes to our suppliers' processes (which we have no control over), do not result in non-compliance with Standards and Specifications listed herein. If (and when) non-compliance conditions are discovered, we make every reasonable effort to correct any issues with our suppliers and may utilize alternate sources until corrections can be made.

Please contact our sales office with any questions or should you require further information.

Cordially,
EDMUND A. GRAY COMPANY, Inc.

Lawrence C Gray, III, Vice President

DOMESTICALLY MANUFACTURED

The pipe we purchase, use, convert and sell, as well as our manufacturing processes, meet or exceed applicable Standards and Specifications.

Although raw materials may be globally sourced from non-domestic manufacturers, materials do undergo a 'Substantial Transformation', as defined by Federal Guidelines.

Per these guidelines, a substantial majority (at least 51%) of total individual product cost(s) are incurred in the U.S.A., therefore these pipe nipples are classified as, and appropriately termed Domestically Manufactured Product.

STEEL PIPE NIPPLES & PIPE
