MALLEABLE IRON FITTINGS

CLASS 150 & 300 | BLACK & GALVANIZED

CERTIFICATION OF COMPLIANCE

The fittings covered by this specification are sourced from factories found all over the world. We do our best to ensure that the businesses we deal with operate ethically and meet all internationally recognized environmental and humanitarian standards.

The Edmund A. Gray Company regularly communicates with our raw material and finished goods suppliers and, to the best of our knowledge and belief, based on their responses to us, as well as our own testing, measurement, and monitoring, that the raw materials and finished goods being supplied to us are also manufactured in accordance with the Standards and Specifications listed herein.

The Edmund A. Gray Company continually inspects finished goods and raw materials to make sensible efforts to ensure that any changes to our suppliers' processes (which we have no control over), do not result in non-compliance with Standards and Specifications listed herein. If (and when) non-compliance conditions are discovered, we make every reasonable effort to correct any issues with our suppliers and may utilize alternate sources until corrections can be made.

Please contact our customer service team with any questions or should you require further information.

Cordially,
EDMUND A. GRAY COMPANY, Inc.

Lawrence C. Gray, III, Vice President

GLOBAL & DOMESTIC SOURCING

Most fittings we sell as part of our product line are globally sourced.

If you have a need for fittings that meet specific sourcing and/or manufacturing requirements, please inform us at the time of quoting or ordering so that we can do our best to provide you with the material that meets those requirements.
